

| The web platform for managing subcontracting orders for orthopaedic needs.

#YourCadCamPartner

Successful subcontracting order with Link.

The platform for connecting orthopaedic professionals* and manufacturers for better order tracking.

Whether you are an orthoprosthesis or a manufacturer, you are confronted with issues such as GDPR compliance and hosting of health data. Rodin4D now offers you the solution to meet these requirements.

Opt for Link, your 100% secure web platform for managing your subcontracting orders.

Performance, efficiency and **compliance** Link combines all the conditions required for efficiently monitoring your fabrication orders and your subcontracted equipment orders.

Health data security and hosting

Convenience

Satisfaction

*Orthoprosthesis, podiatrist, chiropractist, orthopaedist.

How does it work?

Orthopaedic professionals: place an order from the online catalogue of your CFABs* and interact with them.

Manufacturers: offer an online catalogue to the entire Link user community and receive orders with all the information that you need. Get unlimited visibility in the world of orthopaedics.

Available exclusively in Europe

Independent ortho-prothesist who wants to contact an independent CFAB.*

A group of orthopaedic companies with several branches and one or more CFABs.*

Independent manufacturers.

*Manufacturer

Get started with Link.

You are an orthopaedic expert

Place your order and track the production steps!

Connect with your public or private manufacturer within your group and access its equipment catalogue.

Integrate any STL and 3D file into Link from any off-the-shelf CAD/CAM software!

Fill in the order form and send it to your CFAB.

Access your order dashboard quickly.

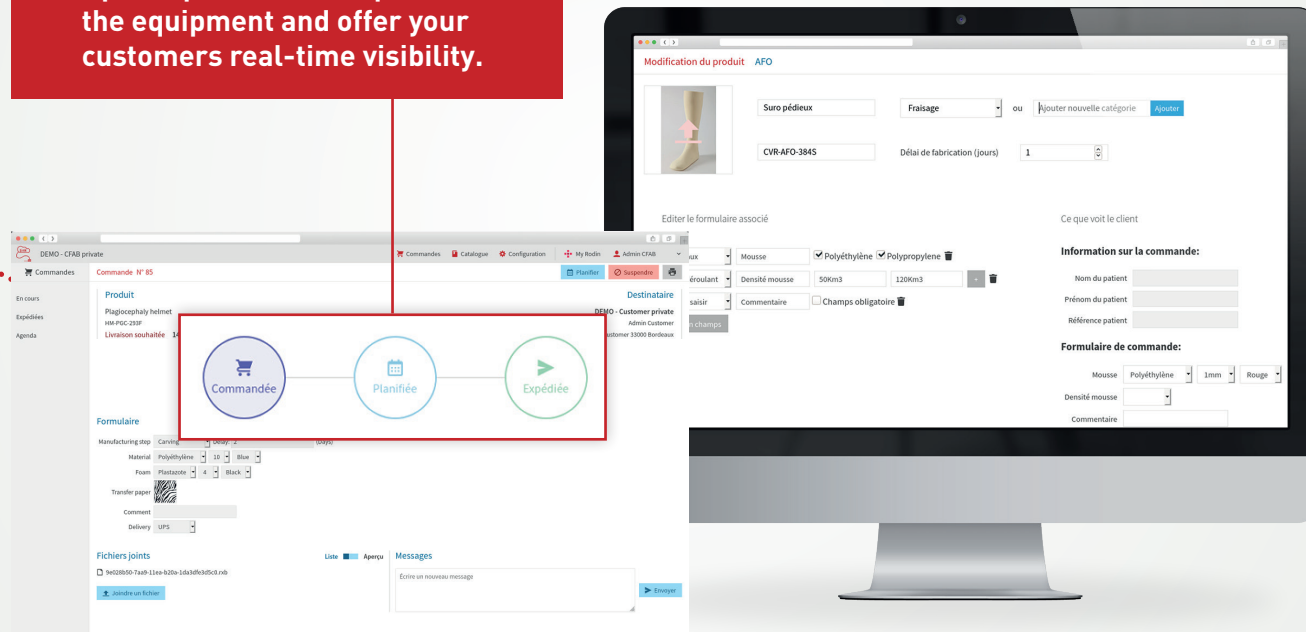

You are a manufacturer

Centralise all your orders in one tool.

Receive orders and begin production!

Update production steps of the equipment and offer your customers real-time visibility.

Create your catalogue with a few clicks!

Orthopaedic expert
